Opposite Duke's Factory, W.T Patil Marg, Chembur(e), Mumbai, 400071**

Introduction

Interventional ultrasound is an integral part of Fetal Medicine. It is an essential skill for any serious practitioner of ultrasound and Fetal Medicine. Learning opportunities of these important skills are limited.

There is a need for training program in interventional procedures like amniocentesis, Chorion villous sampling, foetal blood sampling, embryo reduction etc.

Present Scenario:

In absence of adequate training facilities in interventional procedure, there is acute shortage of such trained clinicians.

This course fills this important gap and is meant to get the participants started on the path of interventional procedures such as amniocentesis, chorion villus sampling and cordocentesis.

This course will benefit those wanting to introduce interventional procedures into their obstetric and gynecology ultrasound practice,

Candidates have the opportunity of interactive learning from the doyens of Fetal Medicine.

Target Audience

This course is designed to meet the needs of sonologists as well as obstetricians, who are well versed in obstetric and gynecological ultrasound scanning and want to add aspects of fetal medicine to their obstetric ultrasound skills and ultrasound practice.

Registration

This course is recommended for Obstetricians-Gynecologists and Radiologists who are interested in incorporating the interventional aspects of fetal medicine into their clinical practice.

TIMING	TOPIC
9.00-9.20 am	Introduction
